

Sue presented the 30th Anniversary Spotlight on BIFHSGO's research and projects in April 2025, which describes initiatives undertaken over the past 30 years that highlight our collective achievements and the important work of our many volunteers. Sue has been the director of research and projects since 2023. She feels very fortunate to work with a number of dedicated volunteers and researchers, on a weekly basis, who are continuing to develop innovative projects for BIFHSGO.
