www.archersoftware.co.uk Archer Software has created two useful tools for mapping British surnames. The 19th-century Surname Atlas plots surname distributions in England, Wales and Scotland from the 1881 census. GenMap UK is a useful tool for compiling maps based on historical or genealogical data relating to the British Isles

gbnames.publicprofiler.org Great Britain family names public profiler (maps from 1881 census and 1998 electoral register)
